LEE Chuk Munn

Chief, StackUp Programme

✉ isslcm@nus.edu.sg

Profile

Chuk is with the Advanced Technology Applications Practice for NUS-ISS. His current responsibilities includes developing courseware, and teaching graduate and public courses in enterprise software engineering, software architecture, web technologies and enterprise Java. Prior to joining NUS-ISS, Chuk works for Oracle and Sun Microsystems where his main responsibilities includes helping customers and partners across all industries in the APAC region, to develop, size and tune applications deployed to Java EE Application Servers. Chuk has more than 20 years of working experience and more than 30 years of developing and debugging software. His interest includes peer-to-peer networks, application frameworks, Java Virtual Machine and dynamic languages. He keeps himself busy by contributing to various open source projects.

What I Teach

Restful APIs Design
